EDUCATION

· Bachelor of Technology in Computer Science and Engineering (AI/ML)

2023-27

SRM Institute of Science and Technology, Ramapuram, Chennai

CGPA: 9.85

PERSONAL PROJECTS

· PersonaSense: AI-Powered Document Intelligence

Tech Stack: Python, torch (2.7.1), transformers (4.43.0), sentence-transformers (3.2.0), pymupdf (1.22.0), NumPy (1.23.3), Docker.

- Advanced, context-aware PDF analysis system.
- Uses state-of-the-art NLP models for semantic understanding.
- Extracts persona-specific key sentences (e.g., Student, AI Developer, Investment Analyst).
- Pipeline approach with Pymupdf for PDF parsing and Vectorized computations with NumPy for efficiency.

· StockPulse: Personalized Stocks Tracking App

Tech Stack: React, Node.js 14, MongoDB, TypeScript, Tailwind CSS, ShadCnUI, Node Mailer, Inngest, BetterAuth

- Built using Next.JS, Typescript and Tailwind CSS for responsive and scalable frontend experience
- Integrated Gemini API with Inngest to automate email generation and scheduling using event driven workflows.
- Implemented MongoDB for user management and BetterAuth for secure authentication.
- Deployed on Vercel, ensuring seamless CI/CD.

· MediLens: Multilingual Visual & Voice-Enabled Medical Assistant

Tech Stack: Gradio, GROQ API, Whisper, gTTS, Deep Translator

- Multilingual, multimodal healthcare chatbot built using Gradio and GROQ API.
- Speech-to-text and automatic language detection powered by Whisper.
- Text-to-speech responses using gTTS for accessibility and providing seamless support for text, voice, and image-based medical queries.
- Integrated translation pipeline with Deep Translator for cross-language interaction.

EXPERIENCE

· SRM Research Centre

March 2025 – May 2025

Machine Learning Developer & Research Intern

On-site

- Applied Natural Language Processing, computer vision, and transfer learning to domain-specific problems.
- Performed data preprocessing, feature engineering, and model evaluation using metrics such as accuracy, precision, recall, and F1-score, achieving >90% accuracy.
- Experimented with state-of-the-art algorithms (YOLO, ResNet, RNNs, Transformers) to improve performance.

· Opportive Web Development Internship

July 2025 – August 2025

Full Stack Developer Intern & Team Lead

Online

- Led a team of interns in developing and deploying full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js).
- Implemented version control workflows with Git/GitHub, integrated CI/CD pipelines, and managed cloud deployments to streamline development.
- Strengthened expertise in JavaScript, React.js, MongoDB, SQL, HTML, CSS, and deployment tools.

TECHNICAL SKILLS and INTERESTS

Areas of Interest: Frontend Development, Data Analysis and Visualization, Model Optimization, Transfer Learning, Deep Learning

Languages and Frameworks: C++, Python, SQL, HTML5, CSS3, ReactJs

Version Control/Deployment: GitHub, Docker, Streamlit, Gradio CI/CD pipeline

Frameworks: ReactJs

Cloud/Databases: MongoDB, Relational Database (MySQL)

CERTIFICATIONS

Python for Data Science, AI, and Development: IBM

Introduction to AI Concepts: Microsoft

MERN- Full Stack Web Development Course: 30DaysCoding

MongoDB Basics for Student Developers: MongoDB

Databases and SQL For Data Science: IBM
